Full stack web developer with an education in economics seeking career building experience in full stack web development. Currently earning a web development certification from the University of Oregon. Known for attention to detail and meticulous work as well as design forward thinking. I strive to make applications not only interactive but well coded and as functional as possible, making it streamlined for the user and the developers. I am ready to bring apt teamwork skills combined with an ability to foresee advances in mainstream web programs to a company's software team.
